

# The Rich History of Plants Teacher Professional Development Education @Adelaide Botanic Garden

For the South Australian History festival we are offering a special teacher professional development session in the Adelaide Botanic Garden.

The session will be led by educators from the Botanic Gardens and will focus on the rich history of plants and how you can use our collections and Australian Curriculum aligned programs to support your students' understandings of HASS and big picture concepts.

There will also be the opportunity to explore your choice of two trails - the Spice Trail or the Aboriginal Plant Use trail.

This professional development is aligned with the Australian National Teaching Standards and a certificate of attendance will be issued.
